Description

The Jetaxe Nozzle is an awesome nozzle for those really tough blockages.

We have used the same rear jet configuration as the Grease Ball nozzle giving it extreme thrust with a tight 20-degree rear jet angle. The 6R1F model has one straight jet drilled at .6mm allowing it to break up debris with both the blade and the jet and has very similar thrust characteristics. The 8 rear no front jet model concentrates on pure thrust letting the axe head do all the work!

This model has 6 rear jets with one front jet with SS Quick Connect Nozzle Adaptor with 1/4" Cone.

Size 1/4" F BSP.

Video of the bigger 3/8" Jetaxe Nozzle
